Sustainability

Charles Alan is helping to create environmentally friendly spaces by partnering with many trend setting suppliers that share our desire to minimize the impact on the built environment. Incorporating solutions such as; "Earth-Cell" foams made from a variety of renewable resources including soy, as well as water based finishes which greatly reduce VOC's. We additionally utilize suppliers of veneers and wood products which are FSC (Forest Stewardship Council) certified. A certified chain of custody suppliers have been harnessed to complete our goal to offer ecologically friendly products. From blanket wrapping consolidated shipments within a 500 mile radius, to extending the foreseeable lifecycle of products all avenues from design, development, and installation are available. If you are applying for LEED credits please contact us early in development so that we might help to target the checklist and credits.

Construction Information

Over the years Charles Alan has been able to incorporate multiple applications for constructing solid, commercial grade furniture. Through consistent improvement in engineering, a transformation from solely using double dowel construction to the advanced mortise and tenon construction has separated Charles Alan from other manufacturers. This change has not only allowed the manufacturing process to speed up, which in turn keeps costs down, but has defined our furniture and company as a front runner for commercial applications. CNC capabilities have produced modern dovetail construction for hardwoods along with frame members for upholstery that are routed within two-thousandths of an inch tolerance. All pieces are secured secondarily using multiple applications, which may include dowels, wood screws, hanger bolts and | or corner blocks for additional strength. Half-lap joints and stub-tenoning have also allowed Charles Alan to extend with confidence a five (5) year warranty. Raw materials are selected specifically for the application and demand of our customers including kiln dried, select hard maple for exposed wood applications. In addition to these advancements, many products reflect

CHARLES ALAN

modular construction, making repair in the field easier and less costly for customers.

Stated Sizes and Dimensions

CHARLES ALAN

Wood Finishes

To help guard against this, please ensure the sample in reference has been in circulation no longer than (12) months from the issue date.

Customers are responsible for supplying the recommended amounts of material as stated in the reference tables.

Charles Alan | Spinneybeck Leather Program

Charles Alan and Spinneybeck have joined together to offer a leather program that achieves customer satisfaction through a commitment to excellence.

Spinneybeck Vicenza Leather is now available in all standard colors as a graded option. Memo samples are available Next Day free of charge by contacting Spinneybeck at 1.800.482.7777. All other Spinneybeck leathers as well as custom colors are also available. Contact Charles Alan customer service for details and pricing.

Tailoring

Fabrics are accurately matched and positioned according to the pattern repeats and nap direction.

Unless otherwise noted, materials are applied RR (railroad laying the material out horizontally vs. up the roll). Fabric repeats are carried through multiple units to produce identical chairs.

Cushions

All of our seat cushions are made from high resiliency, urethane foam wrapped in polyester fiber. You can select soft, standard, or extra firm.

Soft cushions tend to be softer and rounder, which tends to give a piece a more casual look and feel. Unless otherwise specified standard foam will be used on all cushions and back pillows. Firm foam offers more structure and firmness.

Vinyl and leather cushions have fabric zipper bands or vents in zipper bands to facilitate air escape. Loose seat or back cushions can be affixed by means of chrome clips which snap to belts sewn to cushions. Add \$53 list per cushion.

Moisture Barrier

A moisture barrier is available at \$35.00 NET per linear yard on all Charles Alan product. Typical of our moisture barrier process is to double upholster the seat top and in-back with moisture barrier sewn into the fabric construction. While these barriers protect an upholstered core, they do not protect the cover fabric from stain. This barrier should not be used with fabrics that have been previously laminated or have inherent anti-microbial characteristics; i.e. Cryptons™. Contact customer service for yardage requirements and scope of application. Moisture barriers do affect the flammability of product and should not be used in areas requiring Cal 133 flame resistance procedures.

Contrasting Fabric | Welt

There is a 5% NET up-charge for contrasting fabric & welt on all Charles Alan upholstered furniture. Contact customer service for the yardage requirements. For graded fabrics use the highest grade for pricing.

CAL 117 & CAL 133

While Charles Alan makes no claim of flammability of COM(s) or COL(s) all upholstered filling components meet California Bureau of Home Furnishing Technical Bulletin 117 at no up charge and tagged with a law label attached to the dust cover or bottom of each upholstered unit.

Cal 133 Certification

An up charge of \$990 NET per unit in addition to the cost of the unit and any COM(s) | COL(s) is required for each unit to be sent to an independent laboratory for the test burn. If having passed the test an up charge of \$35.00 NET per yard x the total yardage per unit covers the cost of double upholstery with a fire barrier sewn with Kevlar™ thread. Cal 133 Certification is a full-scale burn test that requires that you test every combination of fabric on every piece to be installed. Please allow six weeks for testing.

Cal 133 Compliance

By ordering product Cal 133 compliant Charles Alan Inc. has not been directed to perform any testing. Our product is built to the known industry standards to reduce the flammability of upholstered product

CHARLES ALAN

Healthcare

Healthcare Features

Sovereign & Winston Series

The Sovereign and Winston Series successfully integrate form and function into a complete offering of patient chairs, lounge, sleepers, recliners, tables, benches, dining chairs, modular seating, table units, banquettes and custom.

Nubax® Option for Patient Chair

Charles Alan is the only Healthcare manufacturer in the United States to incorporate the NuBax patented seating technology in the Sovereign and Winston patient chairs, as an option. The technology encourages optimal seating posture by maintaining the natural curvature of the spine.

NuBax® Technology Provides:

- ✓ Enhanced Comfort
- ✓ Improved Blood Flow
- ✓ Reduced Muscle Fatigue
- ✓ Reduced Lower Back Pain
- ✓ Safer and Improved Occupant Postural Position

The patented NuBax technology is a system utilizing foams of varying shape and density within the base cushion to subtly support and tilt the pelvis, allowing the spine to adopt it's natural "S" shaped lordotic curve.

www.nubax.com

Healthcare Anti-Microbial Finish

All exposed hardwoods of Charles Alan healthcare products are finished with an anti-microbial polyurethane sealer and topcoat, which meet or exceed AWI standard rating for 2 component urethanes and are VOC & HAPS compliant with ASTM documentation upon request.

All upholstered patient chair wood components are sealed with our standard finish to build in an additional moisture resistant barrier.

The anti-microbial finish is available on any standard product at a 10% NET up-charge.

Clean Out

Patient chairs, recliners, modular seating, side chairs and dining chairs have a built in clean out feature. A space at the back of the seat that allows dirt and debris to be cleaned out or off for easy care and maintenance.

Modular Frame Construction

The patient chairs are engineered so one may detach the frame from the carcass in the field for easy repair or replacement of covers. Using a cordless drill with Phillips bit, a wratchet with a 1/2" socket or wrench and a flat screwdriver, disassembly takes approximately 5 to 10 minutes. Due to the design of the dust cover, it does not have to be removed and is not in the way of dismantling the chair. For optimal strength in wood joinery, the frames are mortise and tenon or blind dovetail construction. The arms are designed to support for safe ingress and egress. The flow of the arms and the hand rest is inviting and friendly.

Back & Seat Replaceable Cover

The patient chairs come standard with replaceable seat covers. Replaceable back covers are available for an up charge of \$50 NET. Both back and seat replaceable covers are available for the modular seating and dining chairs. The seat covers are an up charge of \$50.00 NET COM per unit and the replaceable back cover with an up charge of \$30.00 NET COM. Replacement seat and | or back covers can be quickly installed on product that originally had replaceable covers. Replacement seat and back covers can be installed on products that were not originally ordered with the replaceable cover option, it would require the removal of staples.

Contrasting Seat & Back

Combination upholstery, (more than one upholstery cover on the same unit) is an option on all the Sovereign and Winston Healthcare products. Pricing for this option is the grade price for the highest-grade

CHARLES ALAN

upholstery selected. If the upholstery covers are the same grade, or are a COM | COL, a 10% NET up charge is applied to the graded price.

Moisture Barrier

An anti-microbial moisture barrier is available at \$35.00 NET per linear yard on all Charles Alan product. Typical of our moisture barrier process is to double upholster the seat top and in-back with moisture barrier sewn into the fabric construction. While these barriers protect an upholstered core, they do not protect the cover fabric from stain. This barrier should not be used with fabrics that have been previously laminated or have inherent anti-microbial characteristics; i.e. Cryptons™. Contact customer service for yardage requirements and scope of application. Moisture barriers do affect the flammability of product and should not be used in areas requiring Cal 133 flame resistance procedures. Please specify specific application requirements.

Foam

All foams are CM (combustion modified) Cal117 in addition to all seat foams being HR (high resilience) HD (high density) from virgin FPF (flexible polyurethane foam). All seats and back foams are covered with a 1oz Cal117 fiber to add crown with the added benefit of being a differential layering material between the cover and foam to ensure the longevity of the upholstered product.

CAL 117 & 133

While Charles Alan makes no claim of flammability of COM(s) or COL(s) all upholstered filling components meet California Bureau of Home Furnishing Technical Bulletin 117 at no up charge and tagged with a law label attached to the dust cover or bottom of each upholstered unit.

Cal 133 Certification

An up charge of \$990 NET per unit in addition to the cost of the unit and any COM(s) | COL(s) is required for each unit to be sent to an independent laboratory for the test burn. If having passed the test an up charge of \$35.00 NET per yard x total yardage per unit covers the cost of double upholstery with a fire barrier sewn with Kevlar™ thread. Cal 133 Certification is a

full-scale burn test that requires that you test every combination of fabric on every piece to be installed. Please allow six weeks for testing.

Cal 133 Compliance

By ordering product Cal 133 compliant Charles Alan Inc. has not been directed to perform any testing. Our product is built to the known industry standards to reduce the flammability of upholstered product incorporating CM (combustion modified) FPF (flexible polyurethane foams) double upholstery with furniture fire barrier blocking material sewn with Kevlar™ thread. An up charge of \$35.00 NET per yard x total yardage per piece builds in redundant layers of flame resistant technology.

Steel Seat Frame

Welded steel seat frames are used on the Winston benches and Sovereign dining chairs, side chairs and modular seating where added strength is needed.

Custom Capabilities

We at Charles Alan embrace customization and hope to work with the customer to realize most needs. Our in-house design staff can help implement small changes to standard product to conversely complete 3-D digital modeling of customized large scale projects. Please contact customer service to discuss scope of change, or project. Once custom items have received proper sign off(s) no changes or cancellations will be accepted.
